

IchigoJam NextStep

Get fun with your IchigoJam when you back home !

NextStep

For using it home

- Micro USB Cable (for Power Supply / AC @100～)
- USB Power Supply 5V (connecting to Outlet @200～)
- Video cable [RCA plug type] (connecting to TV [NTSC] @100～)
- PS/2 keyboard (rounded connector type @1,000～)
- TV/Television (having yello RCA connector. Small Car TV start from @3,000)

Let's challenge

- Sound ! (connecting Piezoelectric sounder on SOUND(EX2) & GND)
command) BEEP 10,100 | PLAY "CDE"
- Type a game program following your paper / text
- Altering the game program which you typed
ex) changing score to double , speed up it , ... and so on
- Try to speed up your keyboard typing speed
If you type more first, you'll be cool !!
- Study IchigoJam BASIC programming language
ex) read a book , BASIC reference
- Make your original game
- Combine electric circuit ex) making game controller , moving Robot

You may make your case of IchigoJam by cardboard , thick paper.

A 100 yen shop (such as Seria , DAISO, Can Do in Japan) is good for finding some items for altering your IchigoJam.

Don't get burnt!
Find supervisor such as your parents when you do soldering with soldering iron.
