

A tiny computer only you.

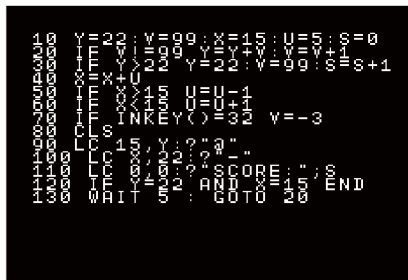

“IchigoJam”, Simple PC for Kids

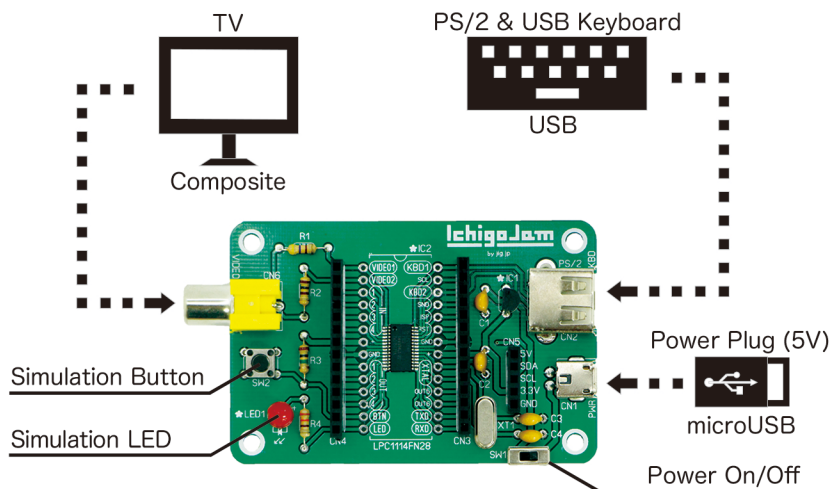

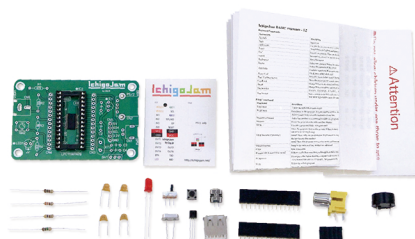

“IchigoJam” is a programming specialized computer for kids with the modern arrangement of programming language for beginners, “BASIC”.

Its structure is so simple that you only need to set the machine connected with the TV, keyboard, and power supplier to use it and this simplicity makes you focus on coding only.

You can also enjoy the excellence of its extensibility, being able to combine with the accessories sold separately.
