Programming lecture

Welcome to programming world with your idea & all computers !
Do you know "a computer is one of the best creation tool" ? It's not only for typing a document .
When you operate a computer with programming , it works for you quickly, continually, kindly .
Let's touch the new world with us.

Lecture 1   To know why we operate to computer
              To get a fun with programming

Lecture 2   Try to make first programming
              Try to make a programming based on own ideas

What we touch today ?

IchigoJam	...	a small computer which can be build by yourself
		Its comes from JAPAN
Scratch	...	the famous Visual Programming Environment
		MIT developed. especially for kids / begginer
