

STEPS to prepare OneUSB

ict4e Inc. , JAPAN

PREPARING:

Before using OneUSB on your PC, Please make sure configure “boot order/priority” setting on BIOS. Only 1th time you need to check. After all, When you plug OneUSB ,OneUSB is working. When you don't plug it Windows(on HDD) is working.

- 1) Plug OneUSB then Power on
- 2) When you see MakerLOGO , click special button (is mentioned later)
- 3) Then you got BIOS menu before booting with Windows (no Windows flag appered)
- 4) goto “boot” menu, then make sure all “USB” items located upper side of HDD
- 5) **SAVE** & restart PC

[DELL / TOSHIBA / Panasonic / SONY / Fujitsu / NEC]

- When you see LOGO , click “F2” button

[HP]

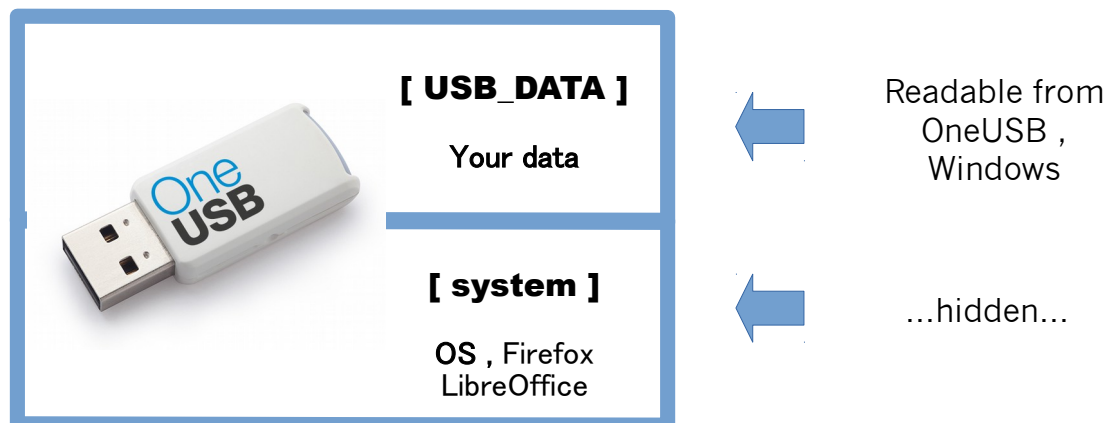

- When you see LOGO , click “ESC” button , then click “F10” button

[Others]

- When you see LOGO , click “DEL” button

YOUR DATA:

When you save your data , Please choose [USB_DATA] . USB_DATA is a just USB Flush disk as usual. You can exchange your data between OneUSB and Windows.
