OneUSB
--- Maintenance free PC, that makes you time ---

<< OneUSB makes Your PC work >>

Do you have **any PC problem？** Such as **GLITCHES**, **CRASHES**, or just simply **TOO SLOW** to get any work done quickly...
In general, these problems are caused by **Hard Drive Failure**, including **PC Virus**. In other words, other PC parts, such as Display, Keyboard, Memory, CPU, are still available.

Why don't we utilize these other PC parts? OneUSB offers ideal solution!

<< How to Use? >>

Just plug OneUSB into your PC and boot it. Then PC is ready to use. That's it!
You don't need any complicated procedures/knowledge to use OneUSB.

<< What is OneUSB? >>

1. Virus Free
    OneUSB refreshes itself automatically every time you boot PC.

2. Hard Drive is not required
    OneUSB does NOT require HDD(Hard Disk Drive). So, you can use PC even its HDD broken.

3. Faster
    Your study/work can be much faster with OneUSB! OneUSB is specifically **designed for low spec PCs**, as our objective is to make old model PCs work again! For further info, refer to <<Requirements>> below.
